CLIPS, QUOTES, COMMENTS is issued on the first and 15th of each month, by the Borderland Sciences Research Associates; at 3524 Adams Ave., San Diego 16, California.

Twelve issues (6 months) for $5.00: Six issues (3 months) for $2.50; Two issues for $1.00. Contains as a rule only short articles and miscellaneous material supplementary to the Round Robin (a BSR bi-monthly).

ADDENDUM: Pg. 9: Personal Bulletin Service - & - Adv. for Markham House Press --

PHOTOGRAPHY OF THE UNSEEN:

This, in a general way, is a continuation of subject matter discussed briefly in CQC E-5 (Photography of the Akashic Records, and Filming the Past) and CQC E-6 (Photographing the Unseen). The interest in this subject has been enhanced and justified by the scientific achievements of the Delawarr Laboratories at Oxford. This last named work has also been summarized at more length in our Round Robin XI 3 for Sept.-Oct. '55 - Art. Tomorrow and Tomorrow, pgs 5-12.

In connection with the "Tomorrow" article and with the whole subject of photographing the Past, the Future, and the invisible and intangible etheric world, our Associate Mrs. I.J.P., of Downey, Calif. sends us quotations from Life & Masters of the Far East, by Baird T. Spalding:

From Chapter 2. - There is a very definite principle that we are working on today, that principle of divinity in everything. This has been proved by our camera taking photographs of past events. We can show that every blade of grass, every tree, shrub, flower, every seed is divine, and were it not for that divinity the seed would not grow, nor the plant, nor the tree, and we can show you definite photography today that the germ in the seed has the exact replica of the form it will bring forth, every time . . ."

"... a negative word has no frequency of vibration whatever. You give it the energy that keeps it living by pronouncing it, and the moment you refuse to pronounce it, that word has no energy of its own.

"There is a camera that shows you that today. You can actually sit before that camera and make your statement, don't say a word but think it, and we will give you your exact thoughts from the graph shown on the film. Then we ask for a statement with a negative word, just to see what happens, and when it comes to that negative word there is no graph on the film, it simply is not recorded.

"That camera is showing today the great frequency of vibration of the human form. If that frequency were not there we would not get it, and if hypnosis were used it would not record."

From Chapter 4. - Let us return again to the high magnification and rapid photography which is being developed. We find that the minutest seed, when its germ cell is photographed under high magnification, has the exact form of that which it will produce and bring forth unerringly, and it is giving off a wave length or frequency which accompanies it throughout its circle of productivity. And through its frequency of vibration it attracts to itself the energy necessary for development into maturity . . .

" . . Humanity has never deviated from that perfect pattern or image. Photography shows those perfect forms, not only surrounding every form, but also other perfect forms coming forth."

From Chapter 6. - ". . . A very fine doctor in one of our large cities worked with us. He asked his associates to send him cases with certain conditions that could not be healed by medical fraternities, together with their X-rays and records. The camera shows where the diseased portions of the body are. Where life and health obtain the film shows the body radiating, scintillating with light. We had patients under that camera whose light went out from the body for thirty feet. Not one person in the 98 cases worked with ever remained before that camera three minutes before they were completely healed and walked away.

All we did was to say: "Here, you are paying all your attention to the dark spots, aren't you? You are not paying any attention to the light and these light places, and where the light is coming from. Now just let go of those dark spots completely. Put your whole thought and attention on the light." Every one of the 98 cases, each of whom was brought in on a stretcher, walked away completely well."

"From Chapter 10 - The photograph of yourself or any friend or individual is but the record of the vibration of that body form."

- end of quotes -

All this, like a mass of other material in the semi-'occult' field, has the air of authenticity. The decade of research by De la Warr and his associates bears out the Spalding experiments so far as basic principles are concerned. The 20 th century is characterized, more than in any other way, by the progressive integra - tion of western science with the esoteric, the 'occult', even the mystical knowledge of the East and of ages past. The disjunction of science and the occult is a di- chotomy - and this fact is being thrust upon us whether we welcome it or not. The culture of the future - if once our race can pass this present turning point - will be wholly new yet very ancient, and profoundly ecclectic --

How many times this has been said! And in how many ways! With how little realization and impact do the masses of mankind receive it!

How stupid is the contempt of western science for metaphysics! This term, metaphysics, properly used, means the study of the nature of substance (ontology) and of the nature of the act of knowing (epistemology). Western science is con- centrated upon ontology, it is drowned to eyes and ears in metaphysics, yet scarcely knows it, never admits it. Yet again, every scholar not benumbed by spec- ialization is aware of this ridiculous impasse. ml

---

SPIDERISM -

"A spider lives in a spider world, conditioned by spider habits. It in - terprets all facts, all events in terms of that world. The corner post of a bicycle shed has nothing to do with bicycles, in its estimation ... A man is a moving tree, and a tree is a wall. . . That this seems to any extent irrelevant to the UFO is due to the fact that you, like all humans, are still trussed, swathed and enmeshed in the web of spiderism . . ."

"The biggest obstacle to progress in our knowledge of the UFO is the fact that we think we know something about them. When we get down into the dust of hu- mility we shall start to walk about among the stars ...

"I cannot for the life of me understand why we seekers after UFO truth remain in the spiderism web. Its strands are three-ply, three-dimensional. We shall not fly an inch into the Reality Realm until we break the threads. As long as we talk of the UFO coming from somewhere - I don't care whether you conceive it as Mars or the moon or the London Zoo monkey house - we shall get nowhere. . . That applies to Space. Go on believing that the UFO travel, if you like. Your feet will be glued to this earth as long as you do. . . So with Time. Demonstrably it is an il- lusion ... The UFO have no relation with time and space. They appear. They dis - appear. They change shape. What is shape? What is time? What is space? These are all concepts subsidiary to reality . . . "

(Arthur Constance, in SAUCERS, Sept. '55. SAUCERS is pub. at Los Angeles 35, Box 35034. Copy, .25. (Underscoring in quote is mine, ML.

WHAT SAYS THE YADA?

(We have a few readers who are indifferent to any and all of the Mark Probert Controls, and a few more who are impatient with the BSR Director for publishing anything said by them. But we hear also from many others who extend to them their liveliest interest and respect - as I do also, after a near-decade of study of their communications. We owe to them 'our' etheric interpretation of the aeroforms, which is the only one worth while in the world today - and which is steadily gaining ground. But always we urge that these (and all other) 'psychic' communications be judged on their own merits quite apart from any alleged origin and authority).

'Concerning the landing at Muroc Base - this truly took place, and a number of highly placed governmental officials were present and examined the craft'(as reported by the BSR at the time). 'The President himself was not there.'

'The Russians also know about the Etheric people and their incursion. Many persons in authority throughout the world have long been informed of the main facts. Such persons have repeatedly met the Etherians.

'At present there is a great rendezvous of the aeroforms in the mountains of Chile.'

'The least rigid censorship just now is that of the French government.'

'The reason for the long period of denials and evasions, is that all governments have feared social repercussions, particularly in the fields of science and religion. There must be - there will be - a great overturning of orthodox religionism - and as for science, the text books will have to be destroyed. I refer especially to basic concepts of Space, of the Ether, of the nature and structure of matter. The science of physics will be reconstructed.'

'The Government of the United States has long ago been told how to build these 'ships' - that is, how to build and to propel the disc-shaped craft, and others. But such craft, constructed by earth people, will not be usable for true space travel. They can be used, however, for travel at great speed within the atmosphere and/or the magnetic field of the earth.'

'These craft will not be usable for interplanetary travel. One reason will be, that your physical organism, your human bodies will not withstand the conditions, particularly the cosmic rays - which might not be immediately fatal' (but after a short time). Now, the etheric people travel in space if they so desire, but this is possible to them because their bodies are not like yours, but made of etheric substance and in frequency rates which are not impeded by the Rays.

'One great objective of these space people, is to put into your minds the idea that there are other values in life than producing machines.

'You must not assume that all the Beings of other planes have human-like forms, or that all their forms are pleasant for you to look at.' (Another Control said recently:'all is not milk and honey among what you call etheric beings').

- -

The Yada thus confirms specifically what he and other Controls have said heretofore - and has been said piecemeal and variously many times by the BSR publications. The peoples of earth face a period of radical reconstruction, of knowledge, belief, and faith. There will be fear and anger and confusion, unless some very wise and powerful guidance appear in the affairs of men. What can YOU do? What can I do? Only, perhaps, to help some one else to understand and to accept in some degree a New Order in a swiftly changing world.

CHILDREN'S DAY AT CASA BLANCA - (Etheric Entities?):

An account of this singular affair appeared in the Riverside Enterprise of August 30, 1955, and the incident occurred about 3:15 p.m. August 28. Our CQC issue of Sept. 15 ("E-6") contained a summary and a few comments. Whoever wishes to dismiss the whole affair as the group hysteria of frightened children has our generous permission to do so; but since everybody is not 'that way' we'll carry-on for a few paragraphs - Eh, what?)

Imprimis: A note from Associate Winona Cromwell of Hemet, Calif. Riverside, Hemet, and Casa Blanca are in the same general area. Assoc. Cromwell writes: "This is to bring to your notice that two of our Club members, Mrs Jean Rowland, an artiste, and Mrs Mary Starbuck, a publicist, on reading the Enterprise account drove over to the children's home and investigated. I vouch for their truthfulness and think Mrs. Rowland did a good job of drawing while the children talked ....."

Secundus, the informal report of Mesdames Rowland and Starbuck, as follows:

"... We were very cordially received by Mr. and Mrs Douglas, parents of Kermit, one of the boys sharing the experience. They invited us in and we soon found ourselves surrounded by about eight children ranging in age from four to 15. The children were very eager to speak of what they had seen; however, we tried to keep them in order so we would have a complete idea of just what happened. This is their story:

As Kermit and another boy wrestled on one of their lawns Sunday about 2:00, Kermit saw this object (No.1 on drawing) in the air above them. As they watched it disappeared and No. 2 appeared. Sometimes the disc would spin as it hovered. Then the lines radiating from it would trail behind as in illus. #2. Soon more children saw them in various colors, but mostly silver. They were of semi-transparent quality and came and went continually. Each time they became visible or invisible a high musical "PING" was heard.

"This went on for some time, but whenever a child went in to call his parents the ships disappeared. I think at first the children enjoyed seeing them, but after a while they became frightened.

"Someone noticed a ship had landed in a vacant field about half a block away. It was very beautiful and colorful. Then two of the boys became conscious of something by the house next door. As they looked more carefully they saw the Being in Illus. #5. He was transparent and they could see the wall right through him. The round disc on his belt shone bright as a mirror and kept shining in their eyes.. They also spoke of bright objects on the ships - #3 - that seemed to send out a ray. The four round objects on the entity's face sparkled like diamonds, the children stated. It did not stand on the ground but hovered above it.

"One little boy of seven started walking toward the ship declaring it was the most beautiful thing he had ever seen. It took two much older and larger boys to stop him, and then they had to trip him to do it. Another boy saw an ARM suspended in air about 20 feet away. It was beckoning to him as in Illus. 7. These beings were about the same height as a four-year-old, and the arm was the size of a child's.

The figure in Illus. 6 appeared to a boy and spoke to him; it seems to have been more solid appearing than the others, with clothing that looked like satin. This being told the boy to climb a nearby tree and they would pick him up in 15 minutes. So he and another boy climbed the tree and waited. The other children pleaded with them but they sat firm. Finally the others turned the garden hose on them, which caused them to come down in a hurry.

"I neglected to mention that after the craft appeared one boy climbed up on a roof to see if one had landed there. He started to climb back down the tree he had come up on, but instead turned around and walked right off the edge of the roof. The other children watched him land on his head, but apparently it didn't hurt him. He had no recollection of falling and wouldn't believe them when they said he had. *

"After the two boys were washed out of the tree a craft came over and circled around, then disappeared. That was the last they saw of them, but it will be a long time before they forget them.

"I am sure the children were telling the truth because they had been and still are very frightened. One boy saw a being with "between two and four arms on each side", but didn't quite know which, so I didn't attempt to include it in the drawings. (SEE PAGE 5-A FOR DRAWINGS BY JEAN ROWLAND).

NOTE: I would like to draw attention to the fact, that some of these visiting entities seem to have a power of levitation, not only of their own bodies and terrestial objects, but of human beings also. In the dubious Oliver Lerch case (1889), in many 'mysterious disappearances' (as of the entire crew of a ship), in "takings" of all kinds of objects and of animals (assuming pro tem. that the facts are essentially as represented) - how is the operation effected? Persons and objects are not picked up easily and lightly, from earth to air, from the seen to the invisible, or by any handy mechanism known to us. This small boy (granted the facts) was led off the roof edge, floated down easily and without harm, and was not even aware of what was happening - by beings some of whom were visible, some translucent or transparent - and in perfect control of the law of gravity. . . And I think this science and Art was known to the ancients, and was derived from the Etherian colonizers of this planet, and if so the building of pyramids and other vast structures in all parts of the world was a comparitively simple matter.

Perhaps some of this knowledge can be recovered and the incredible become the commonplace in the (hoped-for) brave new world.

I am fully aware, that no one in his senses is going to build a metaphysical system on the tales of a dozen frightened children - and nothing else. But everywhere, in the Borderland regions of human experience, it is cumulative data which must be reckoned with - and this is insistent, complex, and world-wide - time-wide or time-long. -- In all the reported extravagances of the UFO incursion, there is nothing impossible or wholly new to the informed occultist and metaphysician.

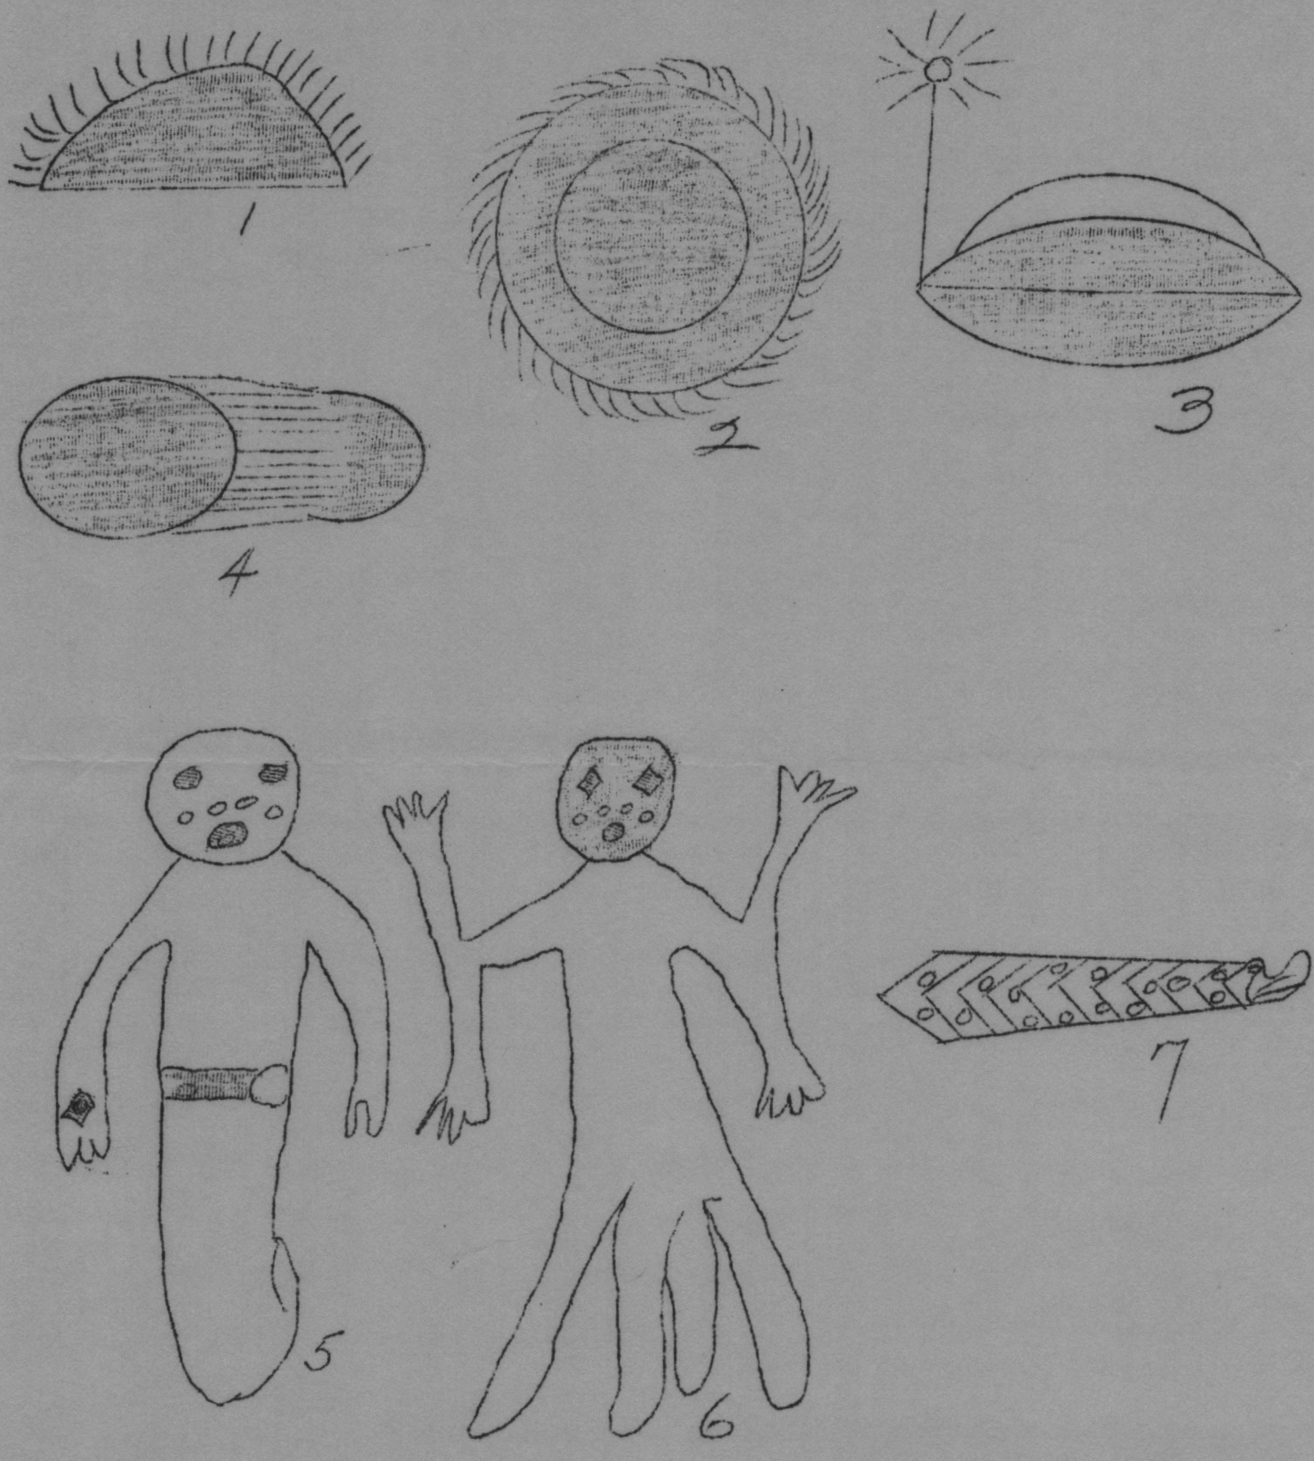
"...SATELLITE PERIL:

It is possible for man to cause the rotation of a space satellite around the earth, but I wish to warn him of the dire consequences of such procedure. As a student of the atmosphere and a meteorologist I predict that a satellite moving at the speed of an earth revolution of from six to eight hours - or even two hours - about 200 to 300 miles up would cause winds of such violence in isolated parts of the earth that we will wish the satellite were out of the sky.

This assumption is based on the premise that all of our weather is caused by forces outside the atmosphere of the earth.

Harold Korkes, in letter to Philadelphia Inquirer,
(Clip from Assoc. Freda Klauber). March 31, 1955.
(Comment invited. ml)

GREATEST PUZZLE OF ALL: by the late Clarkson Dye. 70 pages. An excellent 'first book' for anyone interested in survival, communication, spiritism and spiritualism generally. We now have a small additional supply: $1.00 each.



THE CASA BLANCA ENTITIES

BY JEAN ROWLAND

- FROM DESCRIPTIONS BY THE CHILDREN -

KEY TO SKETCHES ("Children's Day at Casa Blanca") (Pg. 5-A):

OBJECT # 1: Appeared in the air above the children: disappeared and was followed by OBJECT # 2.

FIG. # 3 Sometimes #2 would spin as it hovered; then the radiating lines would lag behind. Soon more children saw them, and in various colors, mostly silver and semi-transparent. They came and went continually. "Ship" No. 3 carried a bright object that seemed to give off a ray.

Illus.# 5 This entity was near-by, almost transparent, carried a round mirror-like disc on its belt. The 4 objects on its face 'sparkled like diamonds. Did not stand on the ground but hovered close above it.

Illus. # 6: 'More solid than the others. Spoke to a boy. Clothing like satin'.

Illus. # 7 An ARM suspended in air, about 20 ft. distant, child size, and beckoning. All these beings were about the size of a 4-yr,old child.

NORTH POLAR ICE CONDITIONS: - Excerpts from Manuscript of "Popular Wisdom for Survival", by Hugh Auchincloss Brown:

The North Pole area of our earth, in our epoch between the recurrent careens of the globe, will not have an ice cap, unless Bering Strait should be eliminated.

Due to the drag of gravity (discussed fully in Part II of the Ms.) the waters of the Pacific Ocean are thrust against the west of the continents of North and South America. Because of this pressure warmer sea waters flow constantly through Bering Strait, from the Pacific to the Arctic Ocean, at a normal speed of about four knots an hour.

Floating ice forms 10 to 16 feet thick on the surface of the Arctic Ocean,and becomes rumpled into hummocks by the pressure of winds and currents.

The discovery of the Arctic Ocean's ice drift resulted when the exploration ship Jeannette was crushed by the ice and sunk, off Wrangel Island, in 1881, and some of its wreckage was picked up three years later off the coast of Labrador.

Snow falls on the drifting ice, which acts like a conveyor belt and carries it and the ice itself into the Atlantic Ocean, where both melt.

Were it not for the continuous flow of water, from west to east through Bering Strait, the Arctic Ocean, which averages about 4000 feet deep, would have been frozen solid centuries ago and an Arctic ice cap would have developed. With two ice caps, one at Antarctica and the other in the Arctic, our Epoch of time between careens of the globe would have been cut about in half and our present civilization would never have developed.

Bering Strait, as a connecting link between oceans, is seen to be of vital importance to our civilization; because of its function of enabling the waters of the Pacific Ocean to flow into the Atlantic Ocean via the Arctic Ocean, and thus act to limit the accumulation of cold storage ice at the North Pole.

(H.A.B. Oct '55

LETTERS RECEIVED:

J.A.C., Chicago, to BSR Director

" . . . Among the uninformed anything inexplicable to their mediocre IQ is attributed to coincidence. (This is a platitude, I'll admit). But a coincidence of academic polarity in concept must be extremely rare: yet this has happened to me. Your PB-4 I read in the afternoon; two hours later I read in the evening paper the enclosed article * from the Editorial page. As I view the situation, this article is an inspired one by the Air Force as a face-saving device (pour sauver les dehors, comme on dit) and to forestall panic; but the A.F. has no explanatory theory for the provenance of the UFO and I devoutly hope that somebody in the higher echelons gets your PB's and the Coming of the Guardians.

Your recent CQC's have been very interesting, especially the latest with Desmond Leslie's account of the Mantell tragedy. But why does he make no mention of Mantell's body? Was that also distributed over six square miles ... In the meanwhile, I note BSR Associates are a little lax in supporting your publications financially, so enclose . . . " 6-8-2

* The "enclosed article" is from the Chicago Daily News of Nov. 4, and carries the heading: Air Experiments Conceded -- It's Official - There Are Flying Saucers. (Columnist, David Lawrence). The gist of the matter is, that the Air Force now has - and has been developing for years-"jet powered, vertical rising, high per - formance aircraft, which will be seen in great numbers "from now on".

This, of course, is a small and partial "out" which the AF has been looking forward to; they should really have saved it up for a Christmas gift both to themselves and to the 'dear pee-pul' whose worries are now ended. So far as dealing with the real problems, with the thousands of sightings, the mass of accumulated data, the immense variety of phenomena, their world-wide distribution, their provenance or origin (in what vast and secret 'factories' have these monsters of the skies been created?) - none of these questions has been answered, except of course to wishful thinkers and candy-stick grabbers whose name is also legion. Now, the phenomena of 1945-46 were not embryonic, but as fully developed as present-day sightings. Does the AF pretend that these marvellous "new"planes" are really a decade old? - and that they sent them all over the world without telling anybody? Even the AF wouldn't 'pull' that one. So it is still necessary to deny and discredit thousands of sightings, wipe the slate clean and get the public mind pin - pointed on a new vertical-flight jet! A bas and Ah Bah!!! in all languages.

Several Associates have called my attention to an article entitled "Men Who Ride in Flying Saucers", published in a magazine called Challenge, November issue. This is strictly a piece of pattern writing, characteristic of third-rate fool-journalism, sly and sneering - the same kind of thing that was done ten years ago by every simple-Simon of the press, and decreasingly ever since, ad nauseam. It is mentioned here as one more sickening sample of the revived campaign, now to be be expected, against the validity of the aeroforms and their attendant phenomena. The reasons for this decade-long mendacity are not at all obscure. Governmental Heads in all Departments are fearful of social repercussions, and the AF in particular has bng committed itself to endless denials which they knew to be false. The struggle to save face by an orderly retreat is now in its last phase. Challenge, of course, is trying to ride this incoming wave, and will be left high and dry with its sudden and inevitable break and ebb.

Recurring to the letter from Assoc. J.A.C., quoted above: The singular omission, by Desmond Leslie (and in other reports also) of any mention of the body of Captain Mantell, has been noted by several of our readers. I have inquired of Assoc. D.L. about this, and info. from any source will be welcomed.

ml

PUBLICATIONS

"FLYING SAUCERS"
Official Quarterly Journal
Civilian Saucer Investigation: Auckland, New Zealand.
P.O. Box 1914. Quarterly.

Many of our BSR Associates are poorly informed concerning sightings, reports and investigations of the UFO in other countries. The current C.S.I. Quarterly (Vol.iii No.2) includes articles on Mars and the Flying Saucers -- UFO Landings -- They Followed Cars -- African Briefs -- Meteorologist Reports -- Duke of Edinborough's Interest -- Seamen Have Reported Saucers -- Theology On Saucers -- Friendship from Outer Space -- Report from Thailand -- New Zealand Skies -- Another Aerial Explosion -- Here and There -- Report from the USA -- many miscellaneous items of interest. C.S.I. President Harold H. Fulton sums up, in course of an address, the CSI attitude and approach:

. . ."Our findings or interpretation of these inexplicable happenings are that the objects are indeed real in every sense and their origin is not of this world. Whether they come from a planet or planets inside or outside our solar system is yet to be ascertained. There is much evidence to more than suggest that some of them are operating from a nearby planet ... The whole pattern does not suggest hostile intent (in spite of) a number of unfortunate accidents in the air . . .

"During the months June through December 1954, the greatest armada of strange sights in earthly skies was recorded... The main theme of this visitation, following the close 'opposition' of Mars to the earth, began in the United States, including Canada; it then moved over to greater Europe, East Africa and and Holy Land. The amazing scenes witnessed in the skies and on terra firma in France alone, during September/October 1954, were without precedent anywhere.

... "The occupants (of landed 'saucers') were as varied as their machines, but all were of a basic human form. . . It is indeed remarkable that all these things have happened without forcing some high-level explanation ... England too experienced many reports and the Air Ministry admitted that a series of radar sightings had them completely baffled. . ."

Concerning "Threads from the Sky" ("Angel Hair" etc) Mr. Fulton quotes from an analysis showing that "the matter consisted of predominant quantities of Boron, Silicon, Calcium, and Magnesium." The threads "immediately disintegrate on being touched by the hand -- one must pick it up with an inanimate object ... It completedisappears in 24 hours. There have been a number of falls, both in New Zealand and elsewhere" .. There is considerable difference here, between these qualities and those reported by investigators in the US, and it seems likely that this stuff must vary considerably in nature.

President Fulton quotes with approval various ideas expressed by the BSR Director, relative to the folly of attacking the "Saucers", and also the BSR interpretation of the "fireballs" (some of them) being "wipers" designed to offset various radiations and fission products.

A useful diagram on page 5 of the Journal shows relative positions and distances of the earth, sun, and Mars, correlated with peak periods in 'saucer' sightings.

This issue of the Journal runs to 32 pages, 8 x 10", and is packed with information which should be known to all serious students of the "saucer" phenomena, however obscure their interpretation may be. Subscription for the four quarterly issues, in the U.S., $1.40.

*----------

THE ORBIT: L.H. STRINGFIELD, Editor. 7017 Britton Ave.,Cincinnati 27,Ohio.
We especially recommend the Nov.4 issue containing "The Case for Interplanetary War.
(Copy, ¢.25)

PERSONAL BULLETIN SERVICE** -- ATTENTION, PLEASE!

In April, 1954, we suggested to our Associates that they send us at least ten stamped and self-addressed envelopes (preferably No. 10, 9½" in length. These were to be used in case of a rigid censorship on printed matter, or urgent news or emergency of any kind. There has been nothing of crucial importance which was fully verifiable, but we have sent out four Bulletins, so that you would know the service has not been dropped.

If you sent us only five envelopes and wish to continue, please note that the next bulletin will exhaust your supply.

The present censorship is real and effective, but so far has been limited to National news services and some radio broadcasting; but any untoward event may result in immediate and rigid control. We are not trying to evade such regulations, but only to use private mail in a legitimate way if other communication is cut off.

What we have in mind, of course, is the extraordinary situation concerning the aeroforms (UFO, "Saucers" et cet.) and other phenomena related to them.
This is NOT a correspondence service and we do not guarantee sensational news or any other kind. This explanation is made for those recent Associates who have not been informed.

We have never made any charge for the Bulletins - but the demand has increased considerably, and to send out 1000 one-page letters costs us about $10.00. So, any small contribution you may want to make will be applied to the service and much apprciated. But the only requirement is that you send us the envelopes as described above.

S.P.S.L. - (Salus Populi Suprema Lex)

M.L.

We have a note from Mr. Egerton Sykes, Director of Markham House Press (31 King's Road, Lon. W.C. 3) to the effect that Markham House makes and distributes more pendulums than anybody else, that these range in price from .60 to $ 2.50 post free, and that their magazine PENDULUM gives a complete list of their newest offerings in this line. We have found Markham House to be prompt and dependable. See our CQC-E-8, pg 6, for further reference to the M.H. Press, as well as to other sources of Pendulum supplies.
As a correction: "The Pasquini pendulum should be more accurately de - scribed as a wand, similar to the Cameron Aurameter, but lighter.

IF YOU HAVE USED BOOKS, in the field of BSR interests, and which you no longer want or need - you might send them along to BSR Hdqrs. with permission to sell - proceeds to be applied to BSR operating expenses. This idea originated with Assoc. E.S.S. (Buffalo, NY); a number of our Associates acted upon it and it has been a substantial help with our expenses. But most of the donated books have now been sold - so, if you have the books, we have plenty of shelf room for them (!),- and mil gracias.

ml

(** Notidy us of change of address.
